

CyberCom Global
The future of hospitality technology

PRESS RELEASE FOR IMMEDIATE RELEASE

AUCKLAND, NEW ZEALAND, NOVEMBER 23rd 2009

CyberCom forms partnership with Nomads World Hotels

CYBERCOM GLOBAL The Asia Pacific's leading hospitality technology provider has completed a deployment at the Fort Street icon "The Fat Camel Hostel & Bar". The Fat Camel, managed by Nomads World Hotels has been a part of the Auckland Backpacker scene for a long time and is well loved by backpackers who come through Auckland from the world over.

The integrated PIN generation system enables staff to generate PIN numbers for the internet terminals as and when they need them very quickly and easily. This means that The Fat Camel is able to provide high quality, profitable internet services to their guests without any concerns around stock control and the holding of stock of internet access cards.

As a part of the deployment visitors to New Zealand staying at the Nomads Fat Camel Hostel now also have access to a hostel wide wifi network meaning they can surf the net from the comfort of their rooms.

CyberCom Global looks forward to a long and enduring relationship with Nomads World Hotels.

---ENDS---

CYBERCOM GLOBAL has offices in New Zealand, Australia, Singapore, Malaysia and Cambodia. They provide internet access services to hotels, airports and other tourism locations around the region. For more information please visit: <http://www.cybercomglobal.com>
