

**CyberCom Global**  
The future of hospitality technology

## **PRESS RELEASE FOR IMMEDIATE RELEASE**

**AUCKLAND, NEW ZEALAND, NOVEMBER 23<sup>rd</sup> 2009**

# **CyberCom forms a partnership with Queen Street Backpackers**

**CYBERCOM GLOBAL** The Asia Pacific's leading hospitality technology provider has completed the deployment of internet kiosks & wireless internet at Queen Street Backpackers in downtown Auckland. The property, located on the corner of Fort Street and Queen Street is a favourite of backpackers from around the world and now, with the help of CyberCom's CyberPacker product they will be able to easily and seamlessly keep in touch with loved ones and friends back home.

The integrated CyberPacker solution uses an advanced on-the-fly pin generation system which enables the property to generate pins as and when required – this means they don't need to worry about running out of stock. What's more the whole system is web based which means it takes minimal training for new staff.

CyberCom looks forward to a long and fruitful business relationship with Queen Street Backpackers.

---ENDS---
