

CyberCom Internet Hotel Guest Access Solution

Keeping your guests happy means more than just ensuring a comfortable stay. Guests want to know that they have access to a reliable computer and secure Broadband Internet facilities at your property, just as they do when they are in the office or at home. What today's travellers really want are hotel facilities and services that will help them to stay productive as well as to keep in touch with their corporate organisations and loved ones even while travelling.

CyberCom Internet solutions have been developed to meet as well as exceed the needs of hotel guests by providing them a way to connect to the Internet with ease and flexibility. Through the plug and play nature of our connectivity solutions, hotel guests are able to establish a connection to the Internet within seconds. No additional software need to be installed on their laptops and no customisation of settings are required.

CyberCom Internet solutions are holistic and complete, there is only minimum intervention is required from the hotel. We install and maintain all required network hardware, provide comprehensive hotel staff training as well as maintain the technical support helpdesk for hotels and guests. It is our intention to be pro-active on network monitoring as well as have dedicated centralised account managers to ensure that our services are available for you 365 days a year

Additionally CyberCom Internet operates on a revenue share model with its hospitality partner so setup costs are hugely mitigated. Contact your CyberCom account manager now to maximise the value potential of your guest.
